New Products Guide
Protective Gear
Fury HD with Nomex® Gloves

The Fury HD with NOMEX® is a heavy-duty version of the popular Fury tactical glove. It shares many features with the standard version such as an extended gauntlet, DuPont™ NOMEX® flame and flash protection, reinforced fingertips, and leather cradle reinforcement to prevent abrasion of the NOMEX® from weapon slides. Enhancements include leather-covered molded hard-shell protection on the knuckles and fingers as well as a thicker dual-layered cowhide palm with water-resistant treatment for enhanced durability. Extra padding underneath the knuckle protector ensures comfort. Nylon loop on wrist allows easy donning and attachment to carabiners. Ideal for entry teams, grenadiers, or any operator using pyrotechnic devices. Patents pending.

Features:
- Extended gauntlet
- NOMEX® flame and flash protection
- Leather-covered molded hard-shell knuckle and finger protection
- Dual-layer cowhide leather palm and fingertip reinforcements
- Leather reinforced fingertips ensure maximum tactility and durability
- Leather cradle reinforcement
- Nylon loop on wrist allows easy donning and attachment to carabiners

Sizes: SM-2X 8156**CT
Color: Coyote Tan $99.99

Fury Commando HD with Nomex® Gloves

The Fury Commando HD with NOMEX® is a heavy-duty version of the popular Fury Commando. **Shotgun Breacher’s Kit (No Stock)**

This kit features a weapon’s catch, weapon’s sling and body armor adapter. The weapon’s catch, sling and sling adapter work together to provide an effective and secure retention system. The weapon’s catch can attach to either a MOLLE-equipped vest using BLACKHAWK’s Speed Clips™ or to a standard issue duty belt using velcro retention straps. The sling attaches to the butt of the stock, while the sling adapter loops around the shoulder section of the breacher’s body armor. Using this versatile retention system, your breaching shotgun is at the ready when you need it or out of the way when you don’t.

K02099-B  Black  $69.99

**Stealth Weapons Catch**

This molded aluminum catch is fully ambidextrous and fits a multitude of weapons.

- Molded aluminum catch covered with T4 webbing
- Adjustable elastic retaining strap for multiple types of weapons
- Fully ambidextrous
- Heavy Duty plastic hook closure

4.5”L x 3”H x 3”W
Weight: 6.5oz

Holsters
SERPA CONCEALMENT HOLSTERS (New Models)

This unique holster design allows you to forget old-fashioned thumb breaks that slow your draw and complicate re-holstering. The patented SERPA Technology lock™ engages the trigger guard as you holster the pistol and won’t let go until you release it. The release is made using your normal drawing motion, with the trigger finger beside the holster body. The perfect retention holster for concealed carry. The weapon can’t accidentally leave the holster.

SERPA LEVEL 3 AUTO LOCK™ DUTY HOLSTER (New Models)

Level 3 retention holsters have long been the standard for law enforcement duty use. The problem has been that many holsters that provide this level of protection are clumsy to operate and can prevent the officer from drawing his weapon rapidly under stress. The Level 3 SERPA Auto Lock holster uses your natural drawing motion to release the weapon. No un-natural motions or complicated sequences to remember, just grab and draw.

3 SLOT LEATHER PANCAKE HOLSTER (New Models and Colors)
This proven design is adaptable, comfortable and contours to your body for excellent concealment. Our reinforced thumb break allows a quick break with minimal motion. The two-piece, contour stitch design is optimized for concealment and durability. The molded design of this premium leather holster is made to curve to your waist structure and the belt slots pull the holster tight to the body for increased concealment.

- Reinforced thumb break for durability and ease of draw
- Covered trigger guard for safety and security, yet cut for a full grip at time of draw
- 3-Slot design allows for strong-side hip carry, as well as appendix carry and cross-draw options

DETACHABLE SLIDE HOLSTER (New Models)
This update to the well-known slide design allows you to attach and detach the holster to your belt in just seconds. Our belt loops go under your belt and fasten with extra strength snaps to secure the holster at your side, without ever undoing your belt. Ideal for detectives and others who are in and out of the office or regularly visit facilities where weapons have to be removed. Covered trigger guard allows high level of safety and the adjustable thumb break gives you a perfect fit for whatever model pistol you carry.

- Increased-strength snaps stay fastened
- Belt loops have angled cut for use with a variety of belt widths
- On or off in just seconds
- Black, non-reflective snap covers

COMPACT SLIDE HOLSTER WITH MAG POUCH  (New Models)

This holster is no bigger than most slide designs, yet offers the ability to carry a spare mag, as well. Our flex- design hugs the waistline and offers a compact, complete package. Open bottom allows use of different slide lengths and increases versatility. Holster is cut to allow a full combat grip, yet covers trigger guard for added safety. Rear belt loop works with unique dual front belt loop design to allow use as strong side or appendix carry. Some may even find it suitable as a cross-draw.

- Available for single-stack and double-stack model pistols
- Molded detent helps keep magazine in place and mag position
- Won’t interfere with draw or re-holster
- Unique dual front belt loop allows multiple carry modes
- Adjustable tension screws

LEATHER INSIDE-THE-PANTS HOLSTER  (New Models)

For deep concealment for a secondary weapon, working undercover or just off-duty, this is the ideal choice. Features include a shirt shield to keep leather between the slide and your body, to increase comfort and prevent shirt from blocking holster. Angle-adjustable belt loop is mounted to reinforced upper body for stability.

- Adjustable tension-screw gives you the choice on level of retention
- Shirt shield protects clothing, keeps holster opening unobstructed and increases comfort
- Allows use for middle-of-the-back, strong side, appendix or cross-draw carry
- Less bulk than most leather inside-the-pants holsters
- Molded sight track for smooth draw and re-holster

LEATHER COMPACT ASKINS (New Models)

This venerable design has been updated with the highest quality leather and a minimalist approach that allows more versatility and comfort than before. The abbreviated body allows use with various lengths of a given model of handgun, so you can keep using your favorite holster with either full-size or compact models. The belt loop sewn to the back of the holster keeps the handgun close to the waist and the trailing belt slot pulls the butt into the body for greater concealment. Reinforced holster mouth assures easy re-holstering and the adjustable tension screw let’s you choose the ease of draw for your handgun. Our injection-molded sight track allows the use of even high custom sights and keeps them from dragging on the holster.

- Compact design aids concealment and increases comfort
- Trailing belt slot pulls grip in, greatly increasing concealment
- Adjustable tension screw allows fine-tuning for personal preference
- Reinforced opening allows consistent ease in re-holstering
- Use full-size or compact model handguns

ANGLE-ADJUSTABLE PADDLE HOLSTER (New Models)

Our paddle holster gives you a flat profile for maximum concealment, with a paddle design that takes your comfort very seriously. Even though the holster is constructed for minimal bulk, it still features a sewn in sight track, wrap around trigger guard cover and a reinforced thumb break for a rapid draw and easy re-holstering. Easy on, angle adjustable paddle stays where you want it, but allows you to remove the holster without undoing your pants This holster is an excellent choice for those who have to remove and replace weapon throughout the day in office or secured facilities. Holster design covers trigger guard, yet is cut to allow a full grip before draw.

- Wrap around trigger guard keeps slick-slide pistols from rocking out from under retention strap
- Sewn in sight track for smooth draw - no worries about custom sights snagging in holster
- Flat profile hugs body for maximum concealment.
- Molded, angle adjustable polymer paddle designed for comfort and stability

LEATHER CHECK-SIX™ HOLSTER (New Models)
Whether behind the back or just behind the hip, this holster gives you options, comfort and speed. Contour double-stitched premium leather has a molded sight track, adjustable tension screw and dual belt slots designed to pull the gun tight to your body. Cut to provide a combat grip from the start, this holster gives you outstanding concealability, even when your covering garment is open. When employing a long gun as primary weapon, this holster’s position is perfect for your handgun, as it won’t interfere with operation of the long gun.

- Designed to hold handgun close to the natural contour of the waist
- Ideal for secondary weapons
- Flat holster back keeps sharp edges away from body
- Low profile design aids concealment

LEATHER SPEED CLASSIC (New Models)
The ultimate in speed for the ultimate in hideout handguns. This adaptation of the famous Berns-Martin design gives you a quick draw with secure carry and goes back to what the original models were, a small holster for a small handgun. This is not the big, bulky version some did later, which ignored the intent of a thin, minimalist design. The holster is handmade of premium, wet-molded leather and heavy duty elastic for a secure fit and a trailing edge belt loop, to pull the grip in tight to the body. Under a T-shirt, sweatshirt or suit coat, this will hold your snub-nose the way it was meant to be.

Duty Gear
Molded Nylon Duty Gear, Plain and Basketweave

Due to increasing customer demand, BLACKHAWK! is introducing a line of duty gear constructed of Nytek®. Belts and pouches will be available in plain and basketweave finishes.

The same space-age chemistry used to develop bullet-proof glass and high performance aircraft components has been successfully applied to fiber and textile engineering to produce the outstanding characteristics of Nytek. The sophisticated technology used to make Nytek has created a product which is the closest reproduction to the natural and complex structure of leather that exists today.

Nytek is not woven or knitted, rather super thin nylon fibers are laid down in a random orientation to produce an intricate webbed matrix. These specially-formed, high performance nylon fibers are nearly indistinguishable from the collagen fibers of leather.

STRENGTH
This innovative technological achievement has resulted in a product which is both lightweight and inherently strong. This microfiber matrix formation is in fact stronger than leather on a strength to weight basis. Genuine leather having the same tensile strength would weigh nearly three times more.

BREATHABILITY
Like leather, Nytek is dense as well as microporous, allowing water vapor and heat to pass through. Because Nytek is breathable, heat is dissipated in warm weather and retained in cold weather. The nylon composition gives the material the same permeability to air and moisture found in high quality leathers.

DURABILITY
Like fine glove leather, Nytek offers outstanding durability and tremendous flexibility. The inherent features of nylon allow it to be the perfect material to meet those demanding applications where comfort and performance are paramount. The ease of cleanability which has been a hallmark of the nylon fiber story is an integral part of Nytek.

The products listed on the next page are being introduced in the 2010 catalog.

**Ergonomic Duty Belt Harness**
Shift the weight of your equipment laden duty belt from your hips to your shoulders. Developed in conjunction with the NIJ, this harness fits under your duty shirt and alleviates discomfort from heavy duty rigs. With a minor modification to your duty shirt, you are ready to go.

**Features & Benefits:**
- Broad range fit for any type of body armor or body type
- No need to buy specific armor packages
- No moving parts to fail

**Academy/Demo Belt**
The Academy Demo belt was first developed for our own use as a one-size-fits-all holster demonstration belt for law enforcement and trade shows. It has been requested by so many training academies and instructors that we now produce it for our customers. No more not having enough of the right belt sizes for your academy class or shooting course. This belt fits all your students and provides enough support for the heaviest pistols and gear. Ideal for defensive tactics classes, handgun courses and anything where you need to fit a wide variety of size individuals and don’t want to stock lots of extra belts.

**Features & Benefits:**
- Hook and Loop Secured
- Polyethylene stiffener to support holsters and equipment

Mid-Ride Belt Loop

Features & Benefits:
Ideal for long-torso officers that need to have the holster ride a bit higher or those with bucket seats in cruisers that push the holster up. The Mid-Ride Allows the SERPA Duty Holsters to ride midway between the Jacket Slot Belt Loop and the High Ride Belt Loop.

44H902BK Mid-Ride Belt Loop $17.99
Entry Tools
BLACKHAWK!® DYNAMIC ENTRY® Collapsible Tool Series™
For years Dynamic Entry® has resisted going to market with a collapsible tool design that did not meet our rigorous durability standards. With a host of collapsible tools on the market today, Dynamic Entry has spent the last several years in development of a world class collapsible tool line that exceeds all of the requirements of operators in the field. The Collapsible Tool Series™ is the direct result of this development process. At the heart of this revolutionary design is an epoxied fiberglass core surrounded by two interlocking stainless steel shafts which house a specially designed dual locking mechanism. The entire handle system is surrounded by a durable molded jacket which provides the operator with a grip surface and also protects the locking mechanism from dirt and debris.

COLLAPSIBLE BREACHER™
Features the newly redesigned tempered stainless steel wedge that includes friction ridges on all contact surfaces that are counter-angled to the head. Designed specifically to grip breaching surfaces securely, these counter-angled friction ridges also provide stability during breaching operations and prevent tool slippage. The Collapsible Breacher™ provides the operator with two lengths: 16.75 inches when collapsed and 24.5 inches when extended for added leverage.

Features & Benefits:
- Epoxied fiberglass core surrounded by two interlocking stainless steel shafts
- A specially designed dual locking mechanism
- A durable molded jacket which provides the operator with a grip surface and also protects the locking mechanism from dirt and debris.
- Newly redesigned tempered stainless steel wedge features counter-angled friction ridges
- Two lengths: 16.75 inches when collapsed and 24.5 inches when extended for added leverage

DE-CB
Weight: 7.4lbs
Length Collapsed: 16.75”
Length Extended: 24.5”
$399.99

COLLAPSIBLE MINI THUNDERSLEDGE™
Featuring a 6-pound, drop-forged head, the Collapsible Mini ThunderSledge™ provides the operator with two lengths: 14.5 inches when collapsed and 22 inches when extended for added striking force.

Features & Benefits:
- Epoxied fiberglass core surrounded by two interlocking stainless steel shafts
- A specially designed dual locking mechanism
- A durable molded jacket which provides the operator with a grip surface and also protects the locking mechanism from dirt and debris.
- Two lengths: 14.5 inches when collapsed and 22 inches when extended for added striking force.

DE-CMTS
Weight: 10.2lbs
Length Collapsed: 14.5”
Length Extended: 22”
$349.99
COLLAPSIBLE STAINLESS HALLAGAN TOOL™
Features the newly redesigned tempered stainless steel wedge and horn that includes friction ridges on all contact surfaces that are counter-angled to the head. Designed specifically to grip breaching surfaces securely, these counter-angled friction ridges also provide stability during breaching operations and prevent tool slippage. The Collapsible Stainless Hallagan Tool™ provides the operator with two lengths: 16.75 inches when collapsed and 24.5 inches when extended for added leverage.

Features & Benefits:
- Epoxied fiberglass core surrounded by two interlocking stainless steel shafts
- A specially designed dual locking mechanism
- A durable molded jacket which provides the operator with a grip surface and also protects the locking mechanism from dirt and debris.
- Newly redesigned tempered stainless steel wedge features counter-angled friction ridges
- Two lengths: 16.75 inches when collapsed and 24.5 inches when extended for added leverage

DE-CSHT
Weight: 7.7 lbs
Length Collapsed: 16.75”
Length Extended: 24.5”

$399.99

BLACKHAWK® DYNAMIC ENTRY® PADLOCK BUSTER™
Redesigned for the 21st century, our Padlock Buster™ features our classic duckbill design constructed of durable and long lasting, military grade AR400 steel. When used in conjunction with any of our ThunderSledges™, the Padlock Buster is stunningly effective in defeating case hardened, non-commercial style padlocks, as well as simply ripping the entire hasp from the door jamb. The handle system of the Padlock Buster is electrically non-conductive to 100,000 volts AC. Designed for situations where the BoltMaster™ is not recommended, the Padlock Buster is the perfect complement to any tactical team’s toolbox.

Features & Benefits
- Classic duckbill design
- Military grade AR400 steel
- Will defeat case hardened locks or rip hasp from door jamb
- Handle system electrically non-conductive to 100,000 volts AC

DE-PB
Wt: 6.3 lbs.
Length: 24.25”

$159.99
BLACKHAWK® DYNAMIC ENTRY® BREACHER SERIES™
These heavy duty and lightweight hallagan-style breaching devices are designed for close quarter breaching situations. The Breacher Series™ utilizes the newly redesigned tempered stainless steel wedge that features friction ridges on all contact surfaces that are counter-angled to the head. Designed specifically to grip breaching surfaces securely, these counter-angled friction ridges also provide stability during breaching operations and prevent tool slippage. Safety-guard handgrips reduce the possibility of the operator's hands slipping onto the working end of the tool. Features an electrically non-conductive handle system which is resistant to 100,000 volts AC.

Features & Benefits
- Features the newly redesigned tempered stainless steel wedge with counter-angled friction ridges
- Counter-angled friction ridges also provide stability during breaching operations and prevent tool slippage
- Safety-guard handgrips reduce the possibility of the operator's hands slipping onto the working end of the tool
- Handle system is electrically non-conductive to 100,000 volts AC

MINI BREACHER
DE-MB
Wt: 4.7 lbs
Length: 14.25” $181.99

BLACKHAWK® DYNAMIC ENTRY® BOLTMASTERS™
The specifically heat-treated cutting edges of the BoltMaster Series™ are the finest available anywhere. All of Dynamic Entry's bolt cutters feature an electrically non-conductive fiberglass handle system with safety-guard handgrips that is resistant to 100,000 volts AC. Lightweight and durable. Now available in a new miniature size, the Mini BoltMaster™ (DE-MBM) has the same size cutting jaws as the standard BoltMaster at a little over half the size.

Features & Benefits
- Specifically heat-treated cutting edges
- Electrically non-conductive fiberglass handle system resistant to 100,000 volts AC
- Safety-guard handgrips
- Lightweight and durable

MINI BOLTMASTER
DE-MBM
Wt: 5.15 lbs.
Length: 16” Jaw Opening: 3/8" $199.99
The Hallagan tool has been a standard entry tool for Law Enforcement, Fire and Rescue professionals for almost 75 years. Using recommendations from operators in the field, Dynamic Entry’s design team has taken this classic design and modernized it for the 21st century. These redesigned tempered stainless steel Hallagan Tool heads feature friction ridges on all contact surfaces that are counter-angled to the head. Designed specifically to grip breaching surfaces securely, these counter-angled friction ridges also provide stability during breaching operations and prevent tool slippage. The solid fiberglass handle is electrically non-conductive to 100,000 volts AC --and features safety-guard handgrips that reduce the possibility of the operator’s hands slipping into the working ends of the bar. The lightweight, sturdy fiberglass and stainless steel construction establishes the Stainless Hallagan Tool™ as the ideal tool for dangerous environments for both tactical and rescue operations. Available in both tactical black and high visibility yellow.

Features & Benefits
- Features the newly redesigned tempered stainless steel wedge with counter-angled friction ridges
- Counter-angled friction ridges also provide stability during breaching operations and prevent tool slippage
- Safety-guard handgrips reduce the possibility of the operator’s hands slipping onto the working end of the tool
- Handle system is electrically non-conductive to 100,000 volts AC
- Available in both tactical black and high visibility yellow.

BLACKHAWK® DYNAMIC ENTRY® MINI TOOL KIT™

To meet the requests for a lighter and stronger tactical entry kit, the design team at Dynamic Entry® developed the Mini Tool Kit™. The Mini BoltMaster™ comes complete with the Mini BoltMaster pouch. Both the Mini Breacher™ and the Micro ThunderSledge™ come with the MOLLE mini tool platform. Designed with Dynamic Entry's legendary durability, these mini tactical entry tools are in a league of their own.

Features & Benefits
- Mini Breacher features the newly redesigned tempered stainless steel wedge with counter-angled friction ridges
- Counter-angled friction ridges also provide stability during breaching operations and prevent tool slippage
- Safety-guard handgrips of the Mini Breacher reduce the possibility of the operator's hands slipping onto the working end of the tool
- All handle systems are electrically non-conductive to 100,000 volts AC
- Mini BoltMaster Pouch and MOLLE Mini Tool Platform feature MOLLE backing for securing to packs and vests

Knives
CQD Mark II Type E Manual Folder
The award-winning CQD® Mark II™ is one of the most envious pieces of equipment in the tactical industry. To make this landmark design available to budget-oriented end users, we are proud to introduce the new Mark II™ Type E. Functionally identical to the original manual version of the Mark II™, the Type E features the same high-strength button-lock mechanism and secondary safety, recessed seatbelt/cord cutter, and carbide glass breaker. However, its handle is constructed of precision injection-molded reinforced nylon mounted to a 420J stainless steel frame. Its spearpoint AUS8A stainless steel blade boasts improved edge geometry for increased cutting performance and a low-profile black PVD-coated finish. Now you can have all the performance of the original Mark II™ at a price that fits every budget.

Features & Benefits:
• Improved edge geometry for better cutting performance
• Re-engineered button-lock mechanism for enhanced strength and durability
• Improved secondary safety
• Tungsten DLC-coated Torx® clip screws

Specifications:
Blade Length: 3.300”/84mm
Overall Length: 7.950”/202mm
Blade Material: AUS8A stainless steel
Blade Finish: Black PVD coating
Edge type: Plain or partially serrated
Handle Material: Injection-molded reinforced nylon with 420J stainless steel liners
Pocket Clip: Right or left-side, tip-down carry

CQD Mark II Aluminum Handle Manual Folder
A smaller, more concealable version of the award-winning Mark I, the Mark II features the same high-strength milled-aluminum construction, state-of-the-art plunge lock mechanism, and secondary safety lock. The butt of the Mark II’s non-slip, ergonomic handle houses a carbide glass breaker for breaching windows while a reversible spring-steel clip supports convenient left or right-side tip-down carry.

Features & Benefits:
• Improved edge geometry for better cutting performance
• Re-engineered button-lock mechanism for enhanced strength and durability
• Improved secondary safety
• Hardened internal blade stop pin
• Tungsten DLC-coated Torx® clip screws

Specifications:
Blade Length: 3.300”/84mm
Overall Length: 7.950”/202mm
Blade Material: AUS8A stainless steel
Blade Finish: Black PVD coating
Edge type: Plain or partially serrated
Handle Material: CNC milled anodized aircraft aluminum with rubberized insert panels
Pocket Clip: Right or left-side, tip-down carry

CQD Mark I Aluminum Handle Manual Folder

With thousands in service all over the globe, the award-winning CQD® Mark I™ has been the flagship of the MOD line since its introduction. Now, based on feedback from countless users, we have taken this field-proven design and made it even better. Every Mark I™ still features meticulously machined aircraft aluminum handles, a recessed seatbelt/cord cutter, and a carbide glass breaker and also boasts the following enhanced features:

Features & Benefits:
- Improved edge geometry for better cutting performance
- Re-engineered button-lock mechanism for enhanced strength and durability
- Improved secondary safety
- Hardened internal blade stop pin
- Tungsten DLC-coated Torx® clip screws

Specifications:
Blade Length: 3.750"/95mm
Overall Length: 9.500"/241mm
Blade Material: 440C stainless steel
