United States Marine Corps!*

Modular Tactical Vest (MTV)

The Modular Tactical Vest (MTV) is a 2-point cut away system, has fully integrated side protection, communication routing channels and increased MOLLE attachment points. In addition to more efficient weight distribution, the MTV provides increased protection to the lateral torso, with less exposed area on the side and under the arms. The MTV also has integrated lower back protection, which is part of the system and can be tucked away if not necessary. Each vest has a removable collar that is 1/2 the bulk of the older collars.

Features:

- Quick-release capability
- Quick attach/detach load carriage option
- Increased coverage, including lower back and kidney area, side torso and shoulder
- Integrated down armor for lower back/spine protection
- Provides additional side armor protection via cummerbund
- Integrated side armor plate pouches
- Integrated communication channels
- Rifle bolster allows for proper stock weld
- Improved closure strap system
- "Component-compatible" features that allow user to easily attach other load-bearing items such as packs or ammo
- Accepts 6"x8", 7"x8", and x-small SAPI side plates
- 2-point quick release system
- Reduced bulk collar
- Multi-point adjustability
- Increased head dispersion and quick dry capability
- Exterior plate pockets
- 360° MOLLE mounting surfaces
- Adjustable throat protection (look down collar)

- **Increased Comfort**
- **Greater Protection**
- **Better Load Distribution**
