Desert Locust Goggle

Sawfly System

Bullet Ant Tactical Goggle

- 1 Optician inserts prescription lenses into Rx Carrier
- 2 Soldier inserts Rx Carrier into either the Sawfly® Spectacle, Desert Locust® Goggle or Bullet Ant® Tactical Goggle
- 3 Result: Corrected vision behind high-impact protection

A soldier's vision must be accurate in order to do his job properly. Over 30% of soldiers require corrective lenses to improve their eyesight, but wearing traditional eyewear under protective eyewear is not the optimal solution.

Revision's Rx Carrier presents a rugged, convenient solution that works.

Designed to fit Revision's full line of military products, including the Sawfly Spectacle System (*either Regular or Large*), Desert Locust Goggle System and the Bullet Ant Tactical Goggle System, this is an effective, efficient way to handle vision correction while providing high impact ocular protection.

THE R_x CARRIER SYSTEM

- RUGGED Carrier frame built for strength and durability
- FIELD-OF-VIEW Wide field-of-view. Carrier frame color does not distract or inhibit vision
- PRESCRIPTION READY Optician inserts personalized prescription lenses. We recommend polycarbonate and other high-impact material for lenses. Accommodates prescriptions up to ± 11
- INTERCHANGEABLE One size carrier fits the Sawfly Regular or Large Spectacle, the Desert Locust Goggle, and the Bullet Ant Tactical Goggle
- CONVENIENT Secure "press fit" insertion positions corrective lenses optimally
